Introduction

Monitoring of journeys and client trips can be a difficult task especially when dealing with multiple journeys. Creation of planned trips is a very useful feature of SicuroTrack which helps in organized monitoring of journeys requiring progress reports within a controlled period. Planned trips provides data for the progress of the journey, time delay between checkpoint arrivals, expected time arrivals, etc.

Application Note

This document provides instructions on how to create planned trips using sets of coordinates, address and points of interest. This also shows the details of how this planned trip can be monitored with generated events and reports.

C. Map Page

Checkpoint – List of the checkpoints and their order.

Passing Time – Date and time details that the device has visited the checkpoint.

Expected Time – Date and time details of the expected arrival of the device in the checkpoint.

Delay/Advance – Shows time difference of the passing time and expected time.

+ for Advanced arrival in checkpoint

- for Delayed arrival in checkpoint

ETA – Shows the expected time remaining for a device to arrive in the checkpoint.

Has Passed? - If the unit has visited the checkpoint

If the unit has not visited the checkpoint

D. Events

Service Prepared – Shown 5 minutes before the planned trips start.

	+ SoDeli Delivery Truck	+ Florian Tibayan	Service Prepared -
--	----------------------------	----------------------	--------------------

Service Started – Generated once the start time of the planned trip is reached.

	+ SoDeli Delivery Truck	+ Florian Tibayan	Service Started -
--	----------------------------	----------------------	-------------------

Checkpoint Reached – Generated once a checkpoint is reached.

10	+ SoDeli Delivery Truck	+ Florian Tibayan	Checkpoint Reached -
----	----------------------------	----------------------	----------------------

Checkpoint Reached Out of Time – Generated once a checkpoint is reached either ahead or behind the allotted time allowance.

This event is generated in two scenarios:

(1) Advanced Arrival at Checkpoint

Expected Arrival Time Period at Checkpoint: 12:30 - 13:00 Actual Arrival at Checkpoint: 12:10 Event Generated: Checkpoint Reached Out of Time

(2) Delayed Arrival at Checkpoint

Checkpoint Expected Arrival Time Period: 12:30 - 13:00 Actual Arrival at Checkpoint: 13:15 Event Generated: Checkpoint Reached Out of Time

Doc. No.	TRNG-XXX- 01	SicuroTrack	Planned Trips	SICURO
	Date	08/29/17 Page Number		Page 16 of 18

Service Ends Complete – Generated once the period limit is reached and all the checkpoints have been visited.

	+ JP Android	+ AF Driver 02	Service Ends Complete - JP test
--	--------------	----------------	---------------------------------

Service Ends Incomplete – Generated once the period limit is reached and not all of the checkpoints have been visited.

	+ JP Android	+ AF Driver 02	Service Ends Incomplete -
--	--------------	----------------	---------------------------

Checkpoint Missed – Generated if a checkpoint is not visited.

Õ	+ JP Android	+ AF Driver 02	Checkpoint Missed - Marriot Planned Trip : JP Test
---	--------------	----------------	--

Unexpected Checkpoint Reached – Generated if a checkpoint is visited not on the established order.

õ	+ JP Android	+ AF Driver 02	Unexpected Checkpoint Reached - Millenium Tower Planned Trip : JP Test
---	--------------	----------------	---

Scenario A

From the scenario A above, generated events are the following:

Unexpected Checkpoint Reached – generated due to reaching Checkpoint 3 which is not the established succeeding checkpoint.

Checkpoint Reached Out Of Time – generated only if the device has reached Checkpoint 3 either ahead or behind its ETA. If the device has reached Checkpoint 3 within the ETA, this event will not be generated.

Checkpoint Missed – generated due to not reaching Checkpoint 2.

Checkpoint Reached – generated due to reaching Checkpoint 3.
